*What makes a
Corian® kitchen?*

Where life meets style

The kitchen is the heart of any home. So it needs to work hard, whilst maintaining its luxuriously effortless look. With Corian® Solid Surface, you can create innovative solutions for almost any design scenario. You'll have the freedom to let your ideas fly, whilst putting functionality first. Don't worry about wear and tear. Corian® is designed to perform. So all you need to focus on is designing the one-of-a-kind kitchen that supports the style *and* the lifestyle of your customer.

Think big. Think bold.
Think what Corian® can become.

*The ultimate
design material*

Designed to
work with you

Explore the world of unconventional geometric design and creative composition, from sharp angles to statement curves. With Corian® Solid Surface you can make any idea become a reality. Think contrasting colour accents to cool colourway serenity. A solid surface that moulds perfectly to bring even the most futuristic design to life. It's the ultimate design material that delivers sumptuous luxury combined with long-lasting durability.

Seamlessly. Stunningly. It's simply up to you to discover the possibilities.

Features & benefits

Choose certainty

Choose Corian®

Corian® is durable - it can withstand daily wear and tear in the most remarkable way. Looking as good as new with just a little daily maintenance.

Corian® is tough - as functional as it is beautiful, Corian® cannot delaminate and its joints are inconspicuous.

Corian® is non-porous - a solidly safe surface for kitchens, it's impenetrable to mould and mildew and liquid simply sits on its exterior.

Corian® is seamless - integrate worksurfaces, sinks and coved backsplashes to create a smooth span that appears to be fashioned from a single element.

Corian® is easy to clean - created for a lifetime of easy care, most residues can be simply wiped away with warm soapy water and a microfibre cloth.

Corian® can be repaired - our expertly-trained fabricators can fix almost any issue, so you can rest easy knowing you've specified a surface to last a lifetime.

Thermoformability Shapes for any space

With Corian® you can take bold, exciting and compelling new design directions. Flexible when heated, Corian® can be thermoformed into a multitude of undulating 2D and 3D shapes. Instead of angles, opt for perfectly rounded corners. Easy on the eye, such curves create dramatic, sensual style, bringing warmth to an environment and providing an ergonomically safe space.

You imagine it. Corian® can do it.

Certified Kosher
Preserving
cleanliness
beautifully

The signature seamless look of integrated Corian® kitchen worksurfaces, sinks and coved backsplashes means there are no crevices to trap dirt and bacteria. Easy-to-clean and non-porous, liquids and stains simply sit on its surface. In fact, Corian® is such a hygienic material that it is certified by STAR-K,* meaning that it is approved for use in Kosher homes.

For where cleanliness is optimal, not optional, choose Corian®.

**STAR-K is a leader in
the international world
of kosher certification.*

#YouCanWithCorian

Smart Countertop Concept

Delivering the future, today

Exploring the unique properties of Corian®, the Smart Countertop reimagines what can be expected from a worksurface. It offers outstanding design freedom and combines striking good looks with uncompromising performance features. Think of a modular accessories bar, sliding sink cover and hidden sloping drainer, all integrated into the worksurface to create a beautiful and clutter-free kitchen.

With Corian®, the only limit is your imagination.

Backlighting Make your next design shine

Create atmosphere. Create ambience.

Create the most dramatic spaces.

With Corian® translucent colours, you can produce the special lighting effects that will take your kitchen design to the next level.

These specially selected colours, featuring enhanced translucency, give you the creative freedom to shine. Whether backlighting islands or backsplashes, these specifically designed hues of Corian® will bring the brightest concepts to life.

Strikingly illuminated. Simply stunning.

Finishing touches

Add the final flourish

Shape it. Curve it. Light it. Integrate it. Make it personal. Make it individual. Make your design add value with the finishing touches that deliver serious wow factor. Include classic or custom edge profiles to provide added decorative style or extend the functionality of the worksurface. Combine practicality with personality by integrating coved upstands, drainer grooves, sink covers and hob bars. And make bespoke elegance even more alluring with the addition of champagne troughs, herb gardens and integrated wine racks.

Whatever your finishing touches, start by thinking Corian®.

Quality Network How working with Corian® works for you

The Corian® Quality Network doesn't just ensure that customers receive the service they expect. It helps you, too. Corian® Home Design Partners are hand-picked and qualified to bring any design using Corian® to life. The service to you includes display benefits, showroom POS, promotional support, training, website leads and a dedicated Residential Account Manager who will supply you with samples, literature and advice.

From concept to completion.
Choose Corian®.

*Primo Signature
Belfast sink*

Traditional with a
contemporary twist

An iconic feature in kitchen design for over three centuries, the Belfast sink is a natural choice for utility rooms or traditional or farmhouse style kitchens. Newly available in Corian®, the design's timeless elegance is now matched by its functionality, durability and easy care attributes.

A classic design made contemporary.

The 1810 Company
stainless steel sinks
The essence of
modern simplicity

Innovation meets style with these striking stainless steel sinks from The 1810 Company. Embracing the best of contemporary European-design, these sinks perfectly blend form and function to make them an ideal off-the-shelf solution for today's discerning client. Easy to clean and incredibly robust, they have a 75 year guarantee so will stay looking stunning for many years to come.

Elegance combined with endurance.

*Axix sinks by
The 1810 Company*
The nexus of
brilliant design

Axix Seamless Technology sinks enable all the elegance of Corian® to flow smoothly from the worksurface into the body of a full stainless steel bowl, cladding the sides but leaving only a gleaming metal base exposed. This sleek and clever concept means the sophistication of Corian® is matched with the 'industrial chic' of steel to create a high-performance sink with an extra touch of resistance against ultra-hot pans or boiling water taps.

Corian® and stainless steel come together seamlessly.

Corian® sinks
A perfect balance
of design and
performance

Whatever your vision, whatever the space, the sheer adaptability of Corian® allows you to seamlessly integrate sinks into your design. Whether you're thinking sharp lines or soft curves, ready-sculpted or bespoke, Corian® sinks will provide a superior and reliable combination of beauty, quality and hygiene. Enhance personalisation by including sliding sink covers, drainer grooves and modular accessory bars in your designs, for added performance and purpose.

Think of it as the basics.
Brought to new heights.

Seamless sophistication Made personal

Integrated hob bars to engraved drainer grooves. Backlighting to textured rear backsplashes. With the ability to seamlessly integrate additional capabilities into a Corian® worksurface, you can create a sophisticated space that's fashionable, functional and completely unique to your customer.

Hob bars - integrated hob bars are a contemporary and attractive solution for protecting the beauty of the Corian® surface from hot pans and utensils.

Drainer grooves - etched and trenched into the surface, drainer grooves provide a practical and aesthetically pleasing solution to assist in the aeration of wet cooking and dining utensils.

Textured rear backsplash - transform a plain backsplash or upstand area into a statement feature through the use of multi-dimensional Corian® textured panels.

Coved upstands - bridge the gap between worksurface and wall with seamless coved upstands. A visually stunning and hygienic way to prevent the build-up of mould and mildew.

Multi-functional troughs - a stunning centrepiece, integrated troughs can be used for everything from chilling champagne to growing herbs. Luxuriously stylish, they can also be teamed with accessories such as glass drainers, chopping boards and knife blocks to ensure the workspace performs in a totally customised way.

The finer points

Use and care

Corian® was created for a lifetime of easy care. However, should your customers have any questions about daily care and maintenance - here's all the information you will need.

Routine care of your Corian® surface

For everyday cleaning, use soapy water or widely available surface cleaners. Remove excess detergent with a soft cloth, rinse surface with warm water and dry with a soft cloth. If necessary use a microfibre cloth and rub over the surface with an ammonia based cleaner, then rinse with water.

This procedure will remove most dirt and residue from your Corian® surfaces. Always clean using a circular motion, from the front to the back, then side to side, overlapping the circles until the entire area has been cleaned. Do not use abrasive or mild abrasive cleaners on high gloss or dark surfaces. Be aware that limescale can build up if water is left to dry on the surface. To prevent this, it is important to wipe the surface completely dry with a microfibre cloth after spills and cleaning. Some colours of Corian® may require more frequent cleaning to maintain a uniform finish.

Special care for stubborn stains

Residues from stubborn stains may require heavier cleaning. Follow the recommendations below to clean these specific stains from your Corian® surface and shapes effectively.

Vinegar, coffee, tea, lemon juice, vegetable juice, dyes, ketchup, lily pollen, saffron, light scratches, cigarette burns, shoe polish, ink marker pen, iodine, mildew, mercurochrome, blood, red wine, perfume: Use a damp microfibre cloth and a mild abrasive cleaning product (except on high gloss or dark surfaces).

Grease, fat and oil residues: Use a microfibre cloth and rub over the stain with some diluted bleach. Rinse several times with warm water and dry with a soft cloth. Bleach can discolour DuPont™ Corian® if not removed completely by rinsing with water afterwards.

Hard water scale, soap, minerals: Use a microfibre cloth and rub over the stains with a standard household limescale remover or vinegar and leave

for 2-4 minutes. Using a second clean microfibre cloth, rinse the area thoroughly with water.

Nail varnish spills: Use a microfibre cloth and rub over the stain with non-acetone-based nail varnish remover. Rinse several times with warm water and dry with a soft cloth.

If the stain is still visible, repeat the operation, this time using very fine-grain sanding paper. If the stain persists, contact the DuPont™ Warranty Centre.

How to prevent permanent damage

Be sure to follow these guidelines to help prevent permanent damage to your Corian® installation. Avoid getting strong chemicals - e.g. paint removers, oven cleaners, acid drain cleaners, acetone-based nail varnish removers etc. - on your surface. If a spill does occur, promptly flush the surface with water to fully rinse off the chemical.

Do not clean using aggressive chemical agents such as acetone, oven cleaners, thinners, strong acids (muriatic acid etc.) or strong bases (caustic soda etc.), or industrial detergents or paint solvents. If a spill does occur, promptly flush the surface with water to fully rinse off the chemical. Do not use metal scrapers, iron brushes or other domestic metal tools to remove stains, paints, plaster or other substances.

In case of severe damage, please contact the DuPont™ Warranty Centre, which will put you in touch with a local DuPont™ Corian® Quality Network Industrial Partner or Service Centre for professional re-sanding or repairing of your DuPont™ Corian® installation. DuPont™ Corian® Quality Network Service Centres are certified by DuPont™ to carry out expert repair and finishing work. They can also handle installation work or offer maintenance contracts to commercial customers to maintain DuPont™ Corian® installations in prime condition.

Kitchen applications

Special care for sinks

Remove all the fat and oil residues resulting from food preparations from the sink, using a detergent or surface cleaner. If necessary, use a mild abrasive cleaning pad or sponge. Fill the sink with diluted household bleach (25% bleach and 75% water) and leave for ½ hour. Afterwards, rinse thoroughly – you should have a beautifully clean sink, with very little effort.

Preventing heat and other damage

It is important to minimise direct heat exposure to protect your Corian® surface. Always use a heat protection pad, trivet (with rubber feet) or protective sink mat for hot cookware, or leave cookware to cool on the hob first. Never put hot pans, particularly cast iron pans, directly onto a DuPont™ Corian® top or in a Corian® sink. Always use the correct size pan on the hob and place it centrally on the ring. An overhanging pan can scorch the surrounding surface.

As with most sinks, pouring boiling liquids directly into a DuPont™ Corian® sink, without running cold water at the same time, may damage the material. If you have an instant boiling water tap, a container should always be used to collect the water as boiling water from this type of tap may cause surface damage in and around the sink. Do not cut directly on Corian® surfaces. Use a chopping board.

Bathroom applications

Daily maintenance of wash basins, shower trays and bathtubs

Simply clean the surface with soapy water or any common detergent in order to remove most of the stains and dirt that may be deposited. Gel or creamy detergents are particularly recommended, together with a mild abrasive cleaning pad or sponge, ensuring that you rinse the treated area properly. By doing this, the original matt finish will be maintained. Some substances such as ink, cosmetics and dyes may release colour onto the surface after extended contact with the surface. All of these can easily be removed by following the special instructions for stubborn stains.

Attention

Shower trays and bathtubs cannot be used autonomously by people with reduced motor skills, or with sensory and/or cognitive impairments (including children). For your personal safety, use them at a maximum water temperature of 40°C. Avoid using them in the vicinity or while using electrical appliances. Pay special attention when using shower trays and bathtubs alone or after taking medicines.

Guaranteed Quality

With proper care, your Corian® surface will stay looking like new. Your DuPont™ Corian® surface carries a Limited Installed Warranty when fabrication and installation are carried out by a Corian® Industrial Partner and member of the Corian® Quality Network. If you decide to sell your home, your warranty is transferable to the new owners. For complete details, go to our website (www.corian.uk) to review the warranty guidelines applicable for your product.

The finer points Wireless charging

Bring wireless charging home with
Corian® Charging Surface.

The Corian® Charging Surface is an innovative solution that allows users to power up their smart devices wirelessly. It's a simple plug-and-play system that works instantly for smartphones, tablets and more.

A single charging unit is installed underneath the stylish Corian® surface, which safely transfers energy to the smart device on the charging spot above - stopping when the battery is full. Highly effective yet hidden from view, so your customers can keep powered up whilst keeping the integrity of your design.

Here's how to wirelessly charge smartphones and tablets:

- (1) Contact your Corian® Quality Network Industrial Partner, who will integrate the wireless charger into your customer's Corian® worksurface.
- (2) Corian® is available in many colours. Choose your preferred one that fits best in your customer's interior.
- (3) The wireless charger will be integrated along with the Corian® worksurface installation, ready for use.
- (4) Your customer should then connect the receiver - a ring or charging case - to their smartphone or tablet*. They then simply place their device over the charging spot and power up begins automatically.

It's that simple!

Frequently asked questions

What is Corian® made from?

Corian® is a solid, non-porous, homogenous surfacing material, made from approximately 1/3 acrylic resin (also known as PolyMethyl MethAcrylate or PMMA) and about 2/3 natural minerals. The main mineral is aluminium trihydrate (ATH) derived from bauxite, an ore from which aluminium is extracted.

How does wireless charging work?

Wireless power, also known as inductive coupling, uses narrow magnetic fields that are a natural part of how electrical current moves through wires. It starts by creating a magnetic field around a hidden electrical coil. The receiving device has a hidden coil that can receive the magnetic energy created, thereby transferring power wirelessly.

What is the Quality Network?

Members of the Quality Network are committed to ensuring that customers receive the highest quality product and service from ALL the companies in the supply chain. Its members are Certified Industrial Partners and Service Centres. All Quality Network members have been assessed and trained by DuPont™ in how to fabricate, install, repair and maintain Corian®. They are also responsible for applying and fulfilling the 10-Year Limited Installed Warranty Program.

What is the standard Corian® sheet size?

Our standard sheet size is 12mm x 3658mm x 760mm, as we generally recommend 12mm for kitchen work surfaces. However, the beauty of Corian® means the material is not restricted by length, width or depth. Oversized islands, long runs and thick edge profiles can be seamlessly achieved with the use of an inconspicuous join.

How do veined colours differ from solid colours?

Corian® veined colours have random and complex patterns that allow you to offer completely unique aesthetics to your customers. As no one sheet is identical, special considerations should be given to the fabrication techniques to ensure the random patterns are blended into the assembly to create the best end result.

Your Quality Network Industrial Partner will be able to provide you with more information on these techniques. However, we also recommend that they provide physical samples of the joins they will use, prior to installation, to ensure that the blending meets with your customers' expectations.

How do I order samples?

To order **free of charge** samples of Corian®, please visit www.corian.uk. Your complimentary samples can be sent to you in the following sizes: 6cm x 4cm or 12cm x 8cm.

Colours of Corian®
Your palette
for perfection

From earthy, subtly textured neutrals, to elegant, ethereal luminosity, Corian® offers the most versatile selection of colours available in contemporary surfacing. Corian® works with designers, artists, architects and industry experts to bring a vibrant palette of colourways that will suit any design sensibilities. Ever evolving to meet modern trends and customer tastes, Corian® has just introduced 10 new inspiring kitchen colours that will help you to push the boundaries of contemporary design further.

Whatever your vision, with Corian® you can deliver the perfect statement project.

Environmental

From raw materials to manufacturing processes, Corian® is committed to reducing its environmental impact. Corian® has been proven to be extremely safe as a surfacing material for over 50 years, with minimal impact on indoor air quality. Corian® Solid Surface has low VOC (Volatile Organic Compounds) content, and the non-porous surfaces do not promote mould or mildew growth when properly cleaned, making them ideal for environments where hygiene is essential, such as food preparations areas.

The material's stain resistance makes it long-lasting, and the ability to repair and renew the surface means that customers won't need to replace it. But it can also be removed, recut, reworked and reinstalled in a different location if required. It can really last a lifetime.

Corian® Solid Surface has received independent certification for environmental performance (such as GreenGuard®, NAHB North American Builders Association, Scientific Certification Systems).

Warranty

Corian® Solid Surface is provided with two levels of warranty protection. The Product Warranty comes as standard and gives a 10-year guarantee that all Corian® products will be free from manufacturing defects for that time after purchase. The 10-year Limited Installed Warranty expands the Product Warranty and ensures that the fabrication and installation of finished Corian® products will be free of defects. This only applies when fabrication and installation are carried out by an Industrial Partner of the Corian® Quality Network.
