

Our Products

Tristone UK offers two major surface products and a comprehensive collection of sink and bowls, providing customers with a wide range of specifications for use throughout the home. As well as Tristone Acrylic Solid Surfaces, Tristone UK also offers a pre-formed solid surface worktop that cover a range of consumer and retailer needs. The Fortis range is a selection of acrylic surface pre-formed worktops for kitchens and bathrooms, installed in the same way as laminate, but with all the benefits of acrylic solid surface. Sink and bowls are available in cast models, thermoformed colour match models and premium Bekjo stainless steel sinks.

What is Tristone

Tristone is an acrylic solid surface, the ideal material that combines practicality, durability, and elegance. It is the perfect material that enables you to create a one-of-a-kind design for limitless self-expression and design possibilities. Tristone is seamless, non-porous, resistant to heat, moisture and bacteria. Tristone can be thermoformed and joined seamlessly. Additionally, inconspicuous joins, integrated sinks, bowls and coved back splashes make Tristone the perfect choice for both residential and commercial applications. The Design potential for Tristone is limitless.

Tristone UK Sink & Bowl Range

Cast Kitchen Sink & Bathroom Bowls

The cast models are made of acrylic resin which is also non-porous, hygienic and easy to clean and maintain. Our cast sink & basins are available in Pure White. The standard designs are available from UK stock. The JK models are only available without overflow and are not supplied with waste kits. Other customized designs and colours are available upon request.

Thermoformed Kitchen Sink & Bathroom Bowls

Thermoformed Sink & Bowls are available in all Tristone UK colours

Acrylic solid surface sheet material is uniformly heated and vacuum formed to a moulded shape in various designs and configurations. Thermoformed sinks are made-to-order. All models offer overflow as an option. Thermoformed sinks are available with stainless steel or solid surface base and are available in a variety of depths.
